QuestionID : 13084      Subject Name  VB.NET

Q1. You would like to return to several articles that you have located in the
Visual Studio .NET Help files. What is an easy way to configure this?

1. Save the files as text files and store them on your local hard drive
2. Use the Bookmark feature of the Visual Studio .NET IDE
3. Add the articles to your list of Favorites
4. Add the articles to the Recent Documents area

**Correct Answer : 3**

Your Answer :

QuestionID : 13090      Subject Name  VB.NET

Q2. Which members of the String class would you use to extract a single
character
from the string (select all that apply)?

1. SubString
2. Length
3. Chars
4. A & C

**Correct Answer : 4**

Your Answer :

QuestionID : 13096      Subject Name  VB.NET

Q3. Your car class has an OutOfFuel event declared. Which line(s) of code
can be
used to add an event handler to your form (select all that apply)?

1. AddHandler myCar.OutOfFuel, MyHandlerProc
2. Private Sub MyHandlerProc() Handles myCar.OutOfFuel
3. AddHandler myCar.OutOfFuel, AddressOf MyHandlerProc
4. B & C

**Correct Answer : 4**

Your Answer :

QuestionID : 13098      Subject Name  VB.NET

Q4. What is another term for inheritance-based polymorphism?

1. Overloading
2. Overriding
3. Substitution

4. Overridable
**Correct Answer : 2**
Your Answer :
QuestionID : 13102      Subject Name   VB.NET
Q5. Which of the following modifiers is not an access modifier?
1. Protected
2. Private
3. MustInherit
4. Friend
**Correct Answer : 3**
Your Answer :
QuestionID : 13107      Subject Name   VB.NET
Q6. Based on the following code, which statement is true?
Private pValue1 as Integer
Public Property Value1() as Integer
Get
Return pValue1
End Get
End Property
1. This is a read-only property.
2. This is a write-only property.
3. The syntax is invalid.
4. The value of pValue1 is returned.
**Correct Answer : 3**
Your Answer :
QuestionID : 13801      Subject Name   VB.NET
Q7. . In the following code, what is the base class?
Public Class Customer
Inherits Company
Public oContact as Contact
End Class
1. Customer
2. Company
3. Contact
4. None of the above
**Correct Answer : 2**
Your Answer :
QuestionID : 13807      Subject Name   VB.NET
Q8. If you want to be sure that the code in the base class is executed, what
keyword
do you use?

1. Me
2. MyBase
3. Child
4. MyClass

**Correct Answer : 2**

Your Answer :

QuestionID : 13814        Subject Name  VB.NET

Q9. Which of the following controls allows you to quickly and easily create a dialog-based preview utility in an application?

1. PrintPreviewDialog
2. PrintPreview
3. PrintDocument
4. Printer

**Correct Answer : 1**

Your Answer :

QuestionID : 13833        Subject Name  VB.NET

Q10. Which of the following controls is used to group collections of controls?

1. Panel
2. TrackBar
3. ComboBox
4. MainMenu

**Correct Answer : 1**

Your Answer :

QuestionID : 13834        Subject Name  VB.NET

Q11. Which of the following controls is used to display mutually exclusive options to the end user?

1. TextBox
2. CheckBox
3. RadioButton
4. GroupBox

**Correct Answer : 3**

Your Answer :

QuestionID : 13844        Subject Name  VB.NET

Q12. Which namespace contains classes that are designed to render advanced visual effects in your applications?

1. System.Drawing
2. System.Drawing.Design
3. System.Drawing.2D
4. System.Drawing.Imaging

**Correct Answer : 3**

Your Answer :

QuestionID : 13845      Subject Name   VB.NET

Q13. You need to control the way in which a form appears when it launches in your
application. Specifically, you want the form to appear centered against the form
that called the child form. What property should you use?

1. Start
2. StartPlace
3. WindowState
4. StartPosition

**Correct Answer : 4**

Your Answer :

QuestionID : 13852      Subject Name   VB.NET

Q14. You would like to quickly design a form using a form that you created earlier as
a template for the new form. Which feature of Visual Basic .NET are you going
to take advantage of?

1. Visual Inheritance
2. Modularity
3. Code re-use
4. Code share

**Correct Answer : 1**

Your Answer :

QuestionID : 15366      Subject Name   VB.NET

Q15. What's the difference between a class field property?

1. A field always has Get and Set Methods
2. A property always has Get and Set Methods
3. None of the above
4.

**Correct Answer : 3**

Your Answer :

QuestionID : 15372      Subject Name   VB.NET

Q16. My.Application.Log.WriteEntry , by default , writes to the file:

1. assemblyname.log
2. Applog.Log
3. Application.Log
4.

**Correct Answer : 2**

Your Answer :

QuestionID : 15385      Subject Name   VB.NET

Q17. How do you implement inheritance in VB.NET?
1. Using Extends Keyword
2. Using Imports Keyword
3. Using Override keyword
4. None
**Correct Answer : 4**
Your Answer :
QuestionID : 15390      Subject Name  VB.NET

Q18. What is the corresponding datatype in VB.Net for variant in VB ?
1. Array
2. Object
3. List
4. String
**Correct Answer : 2**
Your Answer :
QuestionID : 15391      Subject Name  VB.NET

Q19. Which data type of VB has been removed in VB.NET?
1. String
2. Double
3. Byte
4. Currency
**Correct Answer : 4**
Your Answer :
QuestionID : 15394      Subject Name  VB.NET

Q20. How do you achieve interface implementation in VB.NET?
1. Implements
2. Uses
3. Imports
4. Overrides
**Correct Answer : 1**
Your Answer :
QuestionID : 15404      Subject Name  VB.NET

Q21. OPTION exists in VB.NET
**Correct Answer : T**
Your Answer :
QuestionID : 15405      Subject Name  VB.NET

Q22. Dataset is always disconnected
**Correct Answer : T**
Your Answer :
QuestionID : 15406      Subject Name  VB.NET

Q23. What is the lower bound value of array in VB.NET?

1. 0
2. -1
3. 2
4. 3

**Correct Answer : 1**

Your Answer :

QuestionID : 15411      Subject Name   VB.NET

Q24. Which of the following statement is wrong in case of Constructors in VB.NET ?

1. Constructors are always named as New
2. Constructors do not return anything
3. Constructors can not be parameterized
4. Constructors are implicitly called when an object is created

**Correct Answer : 3**

Your Answer :

QuestionID : 15412      Subject Name   VB.NET

Q25. Which of the following NameSpace contains EventLog component?

1. System.Threading
2. System.IO
3. System.Diagnostics
4. System.XML

**Correct Answer : 3**

Your Answer :

QuestionID : 15416      Subject Name   VB.NET

Q26. What is Remoting?

1. Concept which allows code in one AppDomain call on objects of other App Domain
2. A Concept which transmits the data over network
3. A Concept which deploys the code in remote server.
4.

**Correct Answer : 1**

Your Answer :

QuestionID : 15429      Subject Name   VB.NET

Q27. All output from Trace& Debug classes is directed to which collection

1. Trace
2. Debug
3. Listeners
4. None

**Correct Answer : 3**

Your Answer :

QuestionID : 15682      Subject Name   VB.NET

Q28. Procedure and Functions are written to avoid_____ of code
1. Dividing code in block
2. Repition of same code
3. both 1 and 2
4. None of the Above
**Correct Answer : 2**
Your Answer :
QuestionID : 15684      Subject Name  VB.NET

Q29. _____ are the collections of reusable classes or types
1. Collection
2. Dictionary
3. Components
4. Class Library
**Correct Answer : 4**
Your Answer :
QuestionID : 15691      Subject Name  VB.NET

Q30. Events are the actions triggered by system only
**Correct Answer : F**
Your Answer :
QuestionID : 15698      Subject Name  VB.NET

Q31. The _____ is an default event of the toolbox control
1. MultiineChanged
2. textChanged
3. TextModified
4. Validating
**Correct Answer : 2**
Your Answer :
QuestionID : 15699      Subject Name  VB.NET

Q32. Error handling is accomplished using the try...catch...finally structure
**Correct Answer : T**
Your Answer :
QuestionID : 15704      Subject Name  VB.NET

Q33. VB.NET is case sensitive.
**Correct Answer : F**
Your Answer :
QuestionID : 15708      Subject Name  VB.NET

Q34. The _____ property has only the set blocks in its routine
1. Read Only
2. Write Only
3. Read write
4. None Of Above

**Correct Answer : 2**
Your Answer :
QuestionID : 15711      Subject Name  VB.NET
Q35. The _____ property of the connection object that represents the string that specifies the values of the different parameters.
   1. constr
   2. database
   3. path
   4. connectionstring
**Correct Answer : 1**
Your Answer :
QuestionID : 15718      Subject Name  VB.NET
Q36. _____ property of control is with respeact to the position i.e X,Y value
   1. Anchor
   2. Docking
   3. Text Allign
   4. None of the Above
**Correct Answer : 1**
Your Answer :
QuestionID : 15719      Subject Name  VB.NET
Q37. The _____ .net data provider can be used to connect oracle 8i or later version
   1. sql .net data provider
   2. oledb .net data provider
   3. oracle .net data provider
   4. odbc .net data provider
**Correct Answer : 3**
Your Answer :
QuestionID : 15721      Subject Name  VB.NET
Q38. By adjusting the value of _____ property of the form the level of transparency of the form can be changed
   1. Transparency
   2. Transparent
   3. Opacity
   4. All of the above
**Correct Answer : 3**
Your Answer :
QuestionID : 15728      Subject Name  VB.NET
Q39. _____ control is also called as container controls
   1. GroupBox

2. ListBox
3. RadioButton
4. CheckBox
**Correct Answer : 1**
Your Answer :
QuestionID  :  15732          Subject Name  VB.NET
Q40. Winforms provide a control called _____ control that can be used
to display an error when the user enters invalid data.
1. ToolTip control
2. Timer control
3. StatusBar control
4. Error Provider control
**Correct Answer : 4**
Your Answer :
QuestionID  :  15733          Subject Name  VB.NET
Q41. The _____ event of timer is triggered when the specified time interval
has elapsed and the time si enabled
1. Tick
2. Click
3. Timer
4. None Of the above
**Correct Answer : 1**
Your Answer :
QuestionID  :  15735          Subject Name  VB.NET
Q42. SQLConnection class present in _____ namespace
1. System.Data
2. System.Data.OracleClient
3. System.Data.ODBC
4. System.Data.SQLClient
**Correct Answer : 4**
Your Answer :
QuestionID  :  15737          Subject Name  VB.NET
Q43. The class declaration in VB ends with _____ keyword.
1. End
2. End Class
3. End Module
4. All of the above
**Correct Answer : 2**
Your Answer :
QuestionID  :  15738          Subject Name  VB.NET
Q44. The tooltip control is used to display text when the mouse points to

particular control

**Correct Answer : T**

Your Answer :

QuestionID : 15739        Subject Name  VB.NET

Q45. _____ prevents classes to be inherited by other classes in vb.net

1. sealed
2. inheritable
3. inherits
4. not inheritable

**Correct Answer : 4**

Your Answer :

QuestionID : 15747        Subject Name  VB.NET

Q46. When optionstrict option is on, a variable of one type is not converted to another automatically.

**Correct Answer : T**

Your Answer :

QuestionID : 15748        Subject Name  VB.NET

Q47. All methods in vb.net are VIRTUAL

**Correct Answer : T**

Your Answer :

QuestionID : 15762        Subject Name  VB.NET

Q48. We can create an instance of DataReader by executing the ExecuteScalar method of command object.

**Correct Answer : F**

Your Answer :

QuestionID : 15770        Subject Name  VB.NET

Q49. VB.NET also allows u to overload constructors

1. True
2. False
3. -
4. -

**Correct Answer : 1**

Your Answer :

QuestionID : 15788        Subject Name  VB.NET

Q50. The RowFilter sort these properties are associates with DataTable

**Correct Answer : F**

Your Answer :
