Hi DAC69, You have scored : 0

QuestionID : 13074   Subject Name VB.NET

Q1. What is the default starting point when you first launch Visual Studio .NET?

1. The Get Started pane of the Start Page
2. The My Profile pane of the Start Page
3. The What's New pane of the Start Page
4. The last solution that was edited

Correct Answer : 2

Your Answer :

QuestionID : 13077   Subject Name VB.NET

Q2. You must quickly and efficiently set the Startup Project in a Visual Basic .NET

solution. Which tool window should you use?

1. Toolbox
2. Properties
3. Watch
4. Solution Explorer

Correct Answer : 4

Your Answer :

QuestionID : 13078   Subject Name VB.NET

Q3. You need to add several controls to a form in order to design a user interface for

an application. Which tool window should you use?

1. Toolbox
2. Properties
3. Watch
4. Solution Explorer

Correct Answer : 1

Your Answer :

QuestionID : 13080   Subject Name VB.NET

Q4. To execute a block of code if a condition tests to be False, use the Do…Loop block with the While test.

Correct Answer : F

Your Answer :

QuestionID : 13081   Subject Name VB.NET

Q5. You have inadvertently closed the Toolbox in the IDE. You now require the use of
the Toolbox in order to properly design your application. What should you do?

1. Open the Toolbox using the View menu in the IDE
2. Close Visual Studio .NET and re-open the application
3. Select the Toolbox icon in the Solution Explorer
4. Open the Toolbox using the Debug menu in the IDE

Correct Answer : 1

Your Answer :

QuestionID : 13082   Subject Name VB.NET

Q6. What is the purpose of the Hit Count property for breakpoints?

1. It allows you to configure an expression that triggers the breakpoint.
2. It allows you to configure the number of times a breakpoint must be reached before it executes
3. It allows the creation of a file breakpoint.
4. It allows you to view detailed statistics regarding the number of times a breakpoint has been reached.

Correct Answer : 2

Your Answer :

QuestionID : 13086   Subject Name VB.NET

Q7. The following code is used to square a number. The code also adds 1 to the
number before squaring it. What is the value of x after the SquareIt function is called?

Public Sub Main()
Dim x As Int32 = 5
MessageBox.Show(SquareIt(x).ToString())
MessageBox.Show(x.ToString())
End Sub
Private Function SquareIt(ByVal Num As Int32) As Int32
Num += 1
Return Num * Num
End Function

1. 4
2. 5
3. 6
4. 36

Correct Answer : 2

Your Answer :

QuestionID : 13089   Subject Name VB.NET

Q8. You need to create an array that has its size entered by the user when executing
the application. Which line of code allows this?

1. Dim myArray() = New Array(5)
2. Dim myArray() As Int16 = {6, 4, 7, 3}
3. Dim myArray() As Int16 = New Array(iNumOfElements)
4. Dim myArray() As Int16 = Array.CreateInstance(GetType(Int16), _
iNumOfElements

Correct Answer : 4

Your Answer :

QuestionID : 13093   Subject Name VB.NET

Q9. . You are building an application that needs to execute work on a database server
in the form of a stored procedure. This stored procedure takes an extensive amount
of time to complete. Instead of having the user wait for the execution on the
server to complete, you want the code that executes this procedure to notify
the user when it is complete. Which method should you use?

1. Synchronous delegate
2. Asynchronous event
3. Synchronous event
4. Stored procedure event

Correct Answer : 2

Your Answer :

QuestionID : 13098   Subject Name VB.NET

Q10. What is another term for inheritance-based polymorphism?

1. Overloading
2. Overriding
3. Substitution
4. Overridable

Correct Answer : 2

Your Answer :

QuestionID : 13099   Subject Name VB.NET

Q11. What do you look for in use-case descriptions when trying to identify classes?

1. Verbs
2. Adjectives
3. Nouns
4. Adverbs

Correct Answer : 3

Your Answer :

QuestionID : 13100   Subject Name VB.NET

Q12. What technique can you use to implement multiple inheritance in Visual Basic .NET?

1. Subroutines
2. Associated classes
3. Interfaces
4. Overloading

Correct Answer : 3

Your Answer :

QuestionID : 13101   Subject Name VB.NET

Q13. Which of the following items is not a reference type?

1. Array
2. Structure
3. Interface
4. Standard module

Correct Answer : 2

Your Answer :

QuestionID : 13103   Subject Name VB.NET

Q14. What is the value of C1.I1 after the following code is executed?
Dim C1 as New MyClass
Dim C2 as MyClass = C1
C1.I1 = 2
C2.I1 += 1

1. 1
2. 2
3. 3
4. 4

Correct Answer : 3

Your Answer :

QuestionID : 13104   Subject Name VB.NET

Q15. Which of the following lines is a valid constructor for a class?

1. Public Function New() as Object
2. Public Sub New(ByVal Parameter1 as String)
3. Public Sub Initialize()
4. Public Sub Construct()

Correct Answer : 2

Your Answer :

QuestionID : 13106   Subject Name VB.NET

Q16. Which of the following statements are true for a class constructor (choose all that apply)?

1. It runs after the Class_Initialize event.
2. It runs before any other code in the class.
3. Only one constructor is allowed.
4. The constructor can be overloaded.

Correct Answer : 2

Your Answer :

QuestionID : 13108   Subject Name VB.NET

Q17. . Given the following overloaded method
Public Sub New()
Public Sub New(ByVal FirstName as String, ByVal LastName as String)
which of the following additional overloaded methods is not valid?

1. Public Sub New(ByVal FirstName as String, ByVal LastName as String,
BirthDate as Date)
2. . Public Sub New(ByVal LastName as String, ByVal FirstName as String,
BirthDate as Date)
3. Public Sub New(ByVal FirstName as String, ByVal LastName as String,
BirthDate as Date)
4. Public Sub New(ByVal LastName as String)

Correct Answer : 2

Your Answer :

QuestionID : 13110   Subject Name VB.NET

Q18. Which of the follow statements are false? (Select all that apply.)

1. You should always include the Finalize method in a class.
2. You do not need to include a New method in a class.
3. Including the Finalize method in a class improves performance.
4. A & C

Correct Answer : 4

Your Answer :

QuestionID : 13803   Subject Name VB.NET

Q19. What keyword is used to allow derived classes to modify a property or method?

1. AllowChanges
2. Overridable
3. Overloadable
4. Shadows

Correct Answer : 2

Your Answer :

QuestionID : 13804   Subject Name VB.NET

Q20. Which of the following is not a class modifier?
1. NotInheritable
2. Inheritable
3. MustInherit
4. Public

Correct Answer : 2

Your Answer :

QuestionID : 13805   Subject Name   VB.NET

Q21. If a class does not specify a base class, which of the following statements is true?
1. The class cannot use the MyBase keyword.
2. The class inherits from System.Object.
3. The class cannot use the MyClass keyword.
4. The class cannot use the Me keyword

Correct Answer : 2

Your Answer :

QuestionID : 13808   Subject Name   VB.NET

Q22. Which of the following declarations is invalid in a derived class if MyMethod is an overridable method in the base class?
1. Public Sub MyMethod()
2. Public Overrides Sub MyMethod()
3. Public NotOverridable Overrides Sub MyMethod()
4. Public Overloads Sub MyMethod()

Correct Answer : 1

Your Answer :

QuestionID : 13809   Subject Name   VB.NET

Q23. Which of the following statements is not true of classes that contain shared

members?
1. You must create an instance of the class to access members that are not shared.
2. You can access the shared members without creating an instance of the class.
3. Values for shared properties are unique for each instance of the class.
4. Members that are not shared can access the values of shared properties.

Correct Answer : 3

Your Answer :

QuestionID : 13810   Subject Name   VB.NET

Q24. Which area of the Properties window do you use to create properties in an

application that can be controlled after the application is deployed?

1. DynamicProperties
2. Post-mortem
3. PostProperties
4. ConfigFileProperties
Correct Answer : 1
Your Answer :
QuestionID : 13812   Subject Name VB.NET
Q25. Which Accessibility property contains an enum value that helps determine
how an accessibility aid treats a control?
1. AccessibleName
2. AccessibleRole
3. AccessibleDescription
4. AccessibilityTreatment
Correct Answer : 2
Your Answer :
QuestionID : 13814   Subject Name VB.NET
Q26. Which of the following controls allows you to quickly and easily create
a dialog-based preview utility in an application?
1. PrintPreviewDialog
2. PrintPreview
3. PrintDocument
4. Printer
Correct Answer : 1
Your Answer :
QuestionID : 13815   Subject Name VB.NET
Q27. If you have overloaded the New method in a base class, what must you
do in the derived class?
1. Override all New methods of the base class in the derived class.
2. Implement a New method in the derived class for each New method of
the base class that you want available in the derived class.
3. Nothing; all New methods are automatically inherited by the derived
class.
4. None of the above.
Correct Answer : 2
Your Answer :
QuestionID : 13818   Subject Name VB.NET
Q28. If you are defining a method in a class and do not want to allow it to be
modified
by a class that uses your class as a base class, what keyword do you use?
1. NotInheritable

2. NotOverloadable
3. NotOverridable
4. Private
Correct Answer : 3
Your Answer :
QuestionID : 13820   Subject Name VB.NET
Q29. What is the root namespace for the .NET Framework classes?
1. Microsoft.NET
2. Microsoft.System
3. Windows
4. System
Correct Answer : 4
Your Answer :
QuestionID : 13830   Subject Name VB.NET
Q30. Which of the following is an example of an extender provider?
1. ToolTipProvider
2. Panel
3. GroupBox
4. MainMenu
Correct Answer : 1
Your Answer :
QuestionID : 13831   Subject Name VB.NET
Q31. You are developing an application for a client that is used by the inventory
department to reconcile stock quantities. There are two tables on the data source
to be accessed; one table stores the product information for each inventory item,
and the other table stores the inventory categories for the products that the client
sells. The Categories table has a primary key and the Products table has a foreign
key corresponding to the primary key. Which strategy is best for developing the
application?
1. Create an OracleDataReader object and set the object to allow editing. Retrieve a row set from the database using a JOIN query.
2. Create an OracleDataAdapter object and populate a DataSet with the Fill method of the DataAdapter object. The query on the database will be performed with an INNER JOIN statement.
3. Create an OracleDataAdapter object and populate a DataSet with the

Fill method of the DataAdapter object. The query on the database will
retrieve only the Categories table. Create an event handler to be executed
when the user selects a particular category. Have the procedure create an
OracleDataReader object that retrieves only products that are part of the
selected category.

    4. Create two OracleDataAdapter objects. Have one DataAdapter retrieve
the
Categories table and the other retrieve the Products table. Execute the Fill
method on each of the DataAdapters to fill the DataSet. Create a
DataRelation
object in the DataSet that relates the two tables.

Correct Answer : 4

Your Answer :

QuestionID : 13834   Subject Name VB.NET

Q32. Which of the following controls is used to display mutually exclusive
options to the end user?

    1. TextBox
    2. CheckBox
    3. RadioButton
    4. GroupBox

Correct Answer : 3

Your Answer :

QuestionID : 13835   Subject Name VB.NET

Q33. Which of the following steps are used to update a data source from a
DataSet?
Select the most appropriate order for the steps you choose.
i. Create the DataSet.
ii. Open the Connection.
iii. Modify the data in the DataSet.
iv. Execute the Fill method of the DataAdapter.
v. Execute the Update method of the DataAdapter.
vi. Set the SELECT query of the DataAdapter.
vii. Create the DataAdapter using the Data Adapter Configuration Wizard.

    1. ii, i, vii, vi, v, iii, iv
    2. i., vii, vi, iv, iii, v
    3. ii, i, vii, vi, iv, iii, v
    4. vii, vi, iv, iii, v

Correct Answer : 2

Your Answer :

QuestionID : 13836   Subject Name VB.NET

Q34. You need to provide feedback to users of your application if they enter text
inappropriately within the application. Which object should you use to provide
this feedback?
1. Beep
2. BackColor
3. MessageBox
4. DialogBox
Correct Answer : 3
Your Answer :
QuestionID : 13841   Subject Name VB.NET

Q35. If you are using the MaxLength property of your text boxes in order to validate
user input, which type of validation are you most likely using?
1. Form-level
2. Field-level
3. Text-level
4. User-driven
Correct Answer : 2
Your Answer :
QuestionID : 13842   Subject Name VB.NET

Q36. Which of the following objects do you use to draw a simple line in your
application?
1. Brush
2. Color
3. Line
4. Pen
Correct Answer : 4
Your Answer :
QuestionID : 13844   Subject Name VB.NET

Q37. Which namespace contains classes that are designed to render advanced
visual effects in your applications?
1. System.Drawing
2. System.Drawing.Design
3. System.Drawing.2D
4. System.Drawing.Imaging
Correct Answer : 3
Your Answer :
QuestionID : 13845   Subject Name VB.NET

Q38. You need to control the way in which a form appears when it launches

in your
application. Specifically, you want the form to appear centered against the form
that called the child form. What property should you use?

1. Start
2. StartPlace
3. WindowState
4. StartPosition

Correct Answer : 4

Your Answer :

QuestionID : 13858 Subject Name VB.NET

Q39. If you are using the MaxLength property of your text boxes in order to validate
user input, which type of validation are you most likely using?

1. Form-level
2. Field-level
3. Text-level
4. User-driven

Correct Answer : 2

Your Answer :

QuestionID : 15353 Subject Name VB.NET

Q40. You can create Windows Services using VB.Net

Correct Answer : T

Your Answer :

QuestionID : 15355 Subject Name VB.NET

Q41. You can create COM Dll's using VB.NET

Correct Answer : F

Your Answer :

QuestionID : 15358 Subject Name VB.NET

Q42. JIT (in .NET) stands for:

1. Just in Time
2. Job in Transit
3. Java Intermediate Translation
4.

Correct Answer : 1

Your Answer :

QuestionID : 15359 Subject Name VB.NET

Q43. The Visual Basic Compiler is:

1. vbcompiler.exe
2. vb.exe
3. vbc.exe

4.

Correct Answer : 3

Your Answer :

QuestionID : 15361   Subject Name VB.NET

Q44. Every .NET compliant compiler generates IL:

Correct Answer : T

Your Answer :

QuestionID : 15363   Subject Name VB.NET

Q45. which program will you use to assemble a program written in IL:

1. ilasm
2. ildasm
3. clr
4.

Correct Answer : 2

Your Answer :

QuestionID : 15368   Subject Name VB.NET

Q46. The metadata stored in the assembly is called :

1. AssemblyInfo
2. manifest
3. AssemblyData
4.

Correct Answer : 2

Your Answer :

QuestionID : 15369   Subject Name VB.NET

Q47. Which of the folloing kind of collections are supported by VB.NET?

1. ArrayList
2. HashTable
3. DynamicArray
4.

Correct Answer : 1

Your Answer :

QuestionID : 15370   Subject Name VB.NET

Q48. A 'Stack' Collection provides 'first-in-first-out' functionality:

Correct Answer : F

Your Answer :

QuestionID : 15371   Subject Name VB.NET

Q49. A 'Queue' Collection provides 'first-in-first-out' functionality:

Correct Answer : T

Your Answer :

QuestionID : 15377   Subject Name VB.NET

Q50. Data can be loaded into a DataSet from:

1. Microsoft SQL Server
2. Microsoft Exchange
3. Microsoft Active Directory
4.
Correct Answer : 1
Your Answer :
QuestionID : 15383   Subject Name VB.NET

Q51. How do you enable Strict Type Checking in VB.NET?
1. With OPTION STRICT ON keyword
2. With OPTION EXPICIT Keyword
3. With OPTION STRICT OFF keyword
4.
Correct Answer : 1
Your Answer :
QuestionID : 15385   Subject Name VB.NET

Q52. How do you implement inheritance in VB.NET?
1. Using Extends Keyword
2. Using Imports Keyword
3. Using Override keyword
4. None
Correct Answer : 4
Your Answer :
QuestionID : 15386   Subject Name VB.NET

Q53. Which keyword refers the parent of the current object?
1. Me
2. Super
3. Mybase
4. This
Correct Answer : 3
Your Answer :
QuestionID : 15392   Subject Name VB.NET

Q54. How does VB.NET achieve polymorphism?
1. Encapsulation
2. Main function
3. Abstract Class/Functions
4. Using Implementation
Correct Answer : 3
Your Answer :
QuestionID : 15397   Subject Name VB.NET

Q55. By default VB.NET delegate refers
1. Shared Methods

2. Instance Methods
3. Both A & B
4. None
Correct Answer : 1
Your Answer :
QuestionID : 15398   Subject Name VB.NET
Q56. How are the parameters referenced by default in VB.NET?
    1. By Object
    2. By Val
    3. By Ref
    4. None
    Correct Answer : 2
    Your Answer :
QuestionID : 15404   Subject Name VB.NET
Q57. OPTION exists in VB.NET
    Correct Answer : T
    Your Answer :
QuestionID : 15412   Subject Name VB.NET
Q58. Which of the following NameSpace contains EventLog component?
    1. System.Threading
    2. System.IO
    3. System.Diagnostics
    4. System.XML
    Correct Answer : 3
    Your Answer :
QuestionID : 15413   Subject Name VB.NET
Q59. What is serialization of an Object?
    1. Writing the Object to a Stream
    2. Reading the Object from a Stream
    3. Adding the Object to a collection
    4. None of the above
    Correct Answer : 1
    Your Answer :
QuestionID : 15414   Subject Name VB.NET
Q60. Which of the following is not a method of a Connection Object in
VB.NET?
    1. Open ( )
    2. BeginTransaction ( )
    3. Execute( )
    4. Commit Transaction( )
    Correct Answer : 3

Your Answer :

QuestionID : 15416   Subject Name VB.NET

Q61. What is Remoting?

    1. Concept which allows code in one AppDomain call on objects of other App Domain

    2. A Concept which transmits the data over network

    3. A Concept which deploys the code in remote server.

    4.

Correct Answer : 1

Your Answer :

QuestionID : 15417   Subject Name VB.NET

Q62. Assembly manifest contains

    1. Assembly's Identity

    2. Assembly's Reference List

    3. Both A & B

    4.

Correct Answer : 3

Your Answer :

QuestionID : 15418   Subject Name VB.NET

Q63. VbOk,VbCancel,VbAbort are all the enumerated members of

    1. MsgboxStyle Enumeration

    2. MsgboxResult Enumeration

    3. CompareMethod Enumeration

    4.

Correct Answer : 2

Your Answer :

QuestionID : 15421   Subject Name VB.NET

Q64. Web.Config file is of the type

    1. .vb

    2. XML

    3. Resource

    4. Aspx

Correct Answer : 2

Your Answer :

QuestionID : 15426   Subject Name VB.NET

Q65. Which of the following is incorrect in .NET?

    1. System.Text.Stringbuilder

    2. System.Collections.Collection

    3. System.Data.oledb.oledbcommand

    4. Microsoft.VisualBasic.Vbmath

Correct Answer : 2

Your Answer :

QuestionID : 15676   Subject Name VB.NET

Q66. This moethod at the form closes the specified form
1. End()
2. Unloadme/this
3. close()
4. Application.End()
Correct Answer : 3
Your Answer :

QuestionID : 15677   Subject Name VB.NET

Q67. The _____ event is triggered when form is displaying for the first time
1. Activated
2. Deactivated
3. Closed
4. load
Correct Answer : 4
Your Answer :

QuestionID : 15683   Subject Name VB.NET

Q68. The two types of list box supported in winforms is listbox and winforms
Correct Answer : T
Your Answer :

QuestionID : 15685   Subject Name VB.NET

Q69. A Procedure can be declared inside another Procedure
1. True
2. false
3. -
4. -
Correct Answer : 2
Your Answer :

QuestionID : 15688   Subject Name VB.NET

Q70. When an argument is passed using_____ keyword a copy of the variable is passed to the called function
1. optional
2. ByRef
3. ByVal
4. -
Correct Answer : 3
Your Answer :

QuestionID : 15696   Subject Name VB.NET

Q71. The extension of VB.NET program file is _____

1. .vb
2. .sln
3. .vbproj
4. .vbs
Correct Answer : 1
Your Answer :
QuestionID : 15700   Subject Name VB.NET
Q72. An optional argument declaration must have _____ clause
   1. ByVal
   2. ByRef
   3. Optional
   4. None of the above
   Correct Answer : 3
   Your Answer :
QuestionID : 15701   Subject Name VB.NET
Q73. A delegate variable helps to pass a function as argument to a method
   Correct Answer : T
   Your Answer :
QuestionID : 15705   Subject Name VB.NET
Q74. The_____ object is used to establish a connection between the
application and the database.
   1. Connection
   2. Command
   3. DataAdapter
   4. DataReader
   Correct Answer : 1
   Your Answer :
QuestionID : 15707   Subject Name VB.NET
Q75. The value of _____ property indicates whether multiline of text can
be entered in textbox
   1. Accept return
   2. MaxLength
   3. MultiLine
   4. MaxLine
   Correct Answer : 3
   Your Answer :
QuestionID : 15708   Subject Name VB.NET
Q76. The _____ property has only the set blocks in its routine
   1. Read Only
   2. Write Only
   3. Read write

4. None Of Above
Correct Answer : 2
Your Answer :
QuestionID : 15714   Subject Name VB.NET
Q77. In VB.NET using the_____operator you can capture the address
of a function or Procedure
1. ByRef
2. Ref
3. AddressOf
4. sizeOf
Correct Answer : 3
Your Answer :
QuestionID : 15718   Subject Name VB.NET
Q78. _____ property of control is with respeact to the position i.e
X,Y value
1. Anchor
2. Docking
3. Text Allign
4. None of the Above
Correct Answer : 1
Your Answer :
QuestionID : 15719   Subject Name VB.NET
Q79. The _____ .net data provider can be used to connect oracle 8i or
later version
1. sql .net data provider
2. oledb .net data provider
3. oracle .net data provider
4. odbc .net data provider
Correct Answer : 3
Your Answer :
QuestionID : 15720   Subject Name VB.NET
Q80. _____keyword is used for handling events
1. RaiseEvent
2. WithEvents
3. Handles
4. Event
Correct Answer : 3
Your Answer :
QuestionID : 15724   Subject Name VB.NET
Q81. The _____ control is used to display one string at a time from
collection string that can be scrolled through up and down arrows provided

with it
1. NumericUpDown
2. DomainUpDown
3. ListBox
4. DropDownListBox
Correct Answer : 2
Your Answer :
QuestionID : 15725   Subject Name   VB.NET
Q82. Winforms support inheritance of user interfaces
Correct Answer : T
Your Answer :
QuestionID : 15729   Subject Name   VB.NET
Q83. When multiple functions have a similar name and each has different parameter,which allows VB.NET to differentiate among them and each is declared with the _____ keyboard
1. overloads
2. overridable
3. overloadable
4. overrides
Correct Answer : 1
Your Answer :
QuestionID : 15737   Subject Name   VB.NET
Q84. The class declaration in VB ends with _____ keyword.
1. End
2. End Class
3. End Module
4. All of the above
Correct Answer : 2
Your Answer :
QuestionID : 15739   Subject Name   VB.NET
Q85. _____ prevents classes to be inherited by other classes in vb.net
1. sealed
2. inheritable
3. inherits
4. not inheritable
Correct Answer : 4
Your Answer :
QuestionID : 15741   Subject Name   VB.NET
Q86. You can create an abstract class using the_____ keyword in the class declaration
1. Overridable

   2. overloadable
   3. MustInherit
   4. NotOverridable
Correct Answer : 3
Your Answer :
QuestionID : 15743   Subject Name VB.NET
Q87. _____ Requires declaration of all varialbles before they are used.
   1. OptionExplicit
   2. OptionCompare
   3. OptionStrict
   4. Strict
Correct Answer : 1
Your Answer :
QuestionID : 15752   Subject Name VB.NET
Q88. The _____ function converts a value of one type to another as
   1. Type()
